The team at The Employability Partnership has many years of experience providing services to schools across Cambridgeshire and Peterborough. Our knowledge of work experience legal requirements and our extensive database of employers is second to none. We work exclusively with some of the major employers in Cambridgeshire and by working with local employers we are well known across Cambridgeshire and Peterborough.

The Employability Partnership can help to relieve the pressure and has the resources required to manage your processes. With changes in the Gatsby Benchmarks and Statutory Guidance along with plans for development of Modern Work Experience, we are in an ideal position to navigate the new careers landscape. Our rigorous processes are valuable for when you have your Ofsted inspections. Not only do we support with the standard block placements for Year 10, we can support with SEN, Targeted and 6th Form students. With the introduction of the new provisions of Youth Guarantee for NEETS we can also assist.

Our prime objective is to focus on Health and Safety and safeguarding your students in their placements not just to provide a platform to record information. We have built long term relationships with our employers; we know and understand their environments and have a real awareness of the local labour market. We cover H&S, safeguarding, and meaningful activities with employers. Our evaluation from students and employers along with historical data enables us to identify and follow up concerns which adds another layer of quality assurance.

We canvass local employers on your behalf by using our local knowledge at no additional charge. We make ensure that our job descriptions are up-to-date which helps those students who are unable to find their own placements.

We ensure employers have the appropriate Insurance in place and we see a hard copy of it as required legally.

We are the "go to" for employers when they have a query about a student or a placement. TEP are a local contact for employers.

By keeping our processes streamlined and efficient, we are not over-burdening the employers. We are adaptable, contactable and act promptly.

We offer full support and have a personal approach to both schools and employers.

We help with building contacts between employers and schools by passing on knowledge of apprenticeships and part-time positions.

We have kept our charges competitive for the service we provide. Testaments from the schools we work with are exceptional, schools trust us, our experience and knowledge. Employers appreciate our visits, our knowledge and efficiency.

If you are looking at options for 2025-26, please contact us for more information or to arrange a meeting.
