

Did you know that all schools need to have a sustainability lead and a climate action plan by 2025?

Sustainability leadership and climate action plans are key initiatives of the Department for Education's sustainability and climate change strategy for education.

It builds further on existing environmental plans, sustainability strategies or emissions calculations that might already be in place.

The climate action plans should consider four key areas:

1. Decarbonisation
2. Adaptation and Resilience
3. Biodiversity
4. Climate Education and Green Careers

At the heart of this is a desire for schools to create a holistic action plan that helps to:

- increase confidence
- drive positive change
- use data to identify priorities
- help reduce operating costs
- and improve schools' energy efficiency

“

All schools, multi-academy trusts, nurseries, colleges and universities need have these in place by 2025 to evidence your contribution towards the reversal of climate change.

How can Climate Education help your school?

Developed in consultation with teachers and educators, and brought to you by experts from the sustainability charity PECT, Climate Education guides you through sustainability themes to develop, deliver, record and monitor your Climate Action Plan.

We know that teachers are busy, and budgets are tight, so we've combined our 25 years of experience working with and in schools into one flexible, affordable, easy-to-use dashboard.

Our interactive Climate Action Plan tool, supports a whole school approach towards sustainability, enabling you to look at the bigger picture, reduce costs and embed

these principles into all aspects of your school, curriculum and beyond.

It also provides you with access to tailored lesson plans, resources, activities, training, green careers and funding to help save you time and provide you with the most up-to-date information.

We also have additional services available for schools to access including a schools site development consultation service and planting schemes.

Climate Education is the only accreditation for schools that is totally flexible and tailored to your own climate action plan.
